The Copacabana • 268 West 47th St, NYC

With a special performance by Grammy Award Winner
MIRI BEN-ARI

COCKTAIL ATTIRE
THIS EVENT WILL BE FILMED

The Kellner Family Pediatric Liver Disease Foundation

The Kellner Family Pediatric Liver Disease Foundation was founded 8 years ago, shortly after Raphael, the son of Samantha and Andrew Kellner, underwent a life-sustaining liver transplant. Ever mindful of the tragedy that they were fortunate to avoid and set on helping other families who were faced with the same trying circumstances, the Foundation was established.

The mission of the Foundation is to reduce the incidence of pediatric liver disease through research, awareness and education, provide resources to families who are affected by pediatric liver disease and to promote awareness of organ donation. To date, with the help of past donations and the extraordinary generosity of our donors we have been able to make significant grants including:

- The funding of a Fellowship at the Yale/New Haven Medical Center – Liver Transplant Department (through which the care of patients, research and training are being advanced)
- The American Liver Foundation (earmarked for pediatric liver diseases)
- The Organ Donor Network of New York (to further their eternal quest to register all of us as organ donors)
- And most gratifying, we sponsored an infant baby, Zoe, from Guatemala, to come to the United States for a liver transplant, as well as an infant baby Daniel who received a liver transplant in Columbia. Without our funding and your continued support, these babies would not have survived.

Miracles Happen

Before

Now

Raphael Kellner, Age 8

Date of Birth 7/15/2003

Date of Transplant 1/29/2004

Before

Now

Alexander Jack "Jax" Schindler, Age 7

Date of Birth 12/06/2004
